TELEPHONE CONVERSATION RECORD

DATE OF CALL: 2-06-86 TIME OF CALL: 1530 Hours

PERSONS INVOLVED:

1) Steve Kinser, EPA/Superfund 2) Hubert Wieland, E&E/FIT
(913)236-2856 (913)432-9961
3) _____ 4) _____

PROJECT TITLE: Vulcan Materials PROJECT NUMBER: R-07-8602-12

CLIENT: EPA

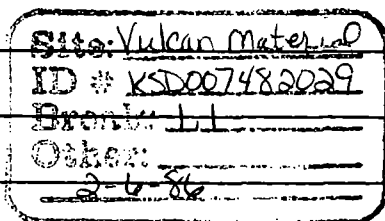

SUBJECT OF CALL: CBI clearance and Scope of Investigation

RESUME OF CONVERSATION:

Steve stated that CBI information on Vulcan Materials is under RCRA and to
talk to Fran Gentry about clearance.

I asked Steve about the scope and purpose of this investigation. He stated
that there were three basic reasons: 1)to develop EPA's own data on this site
and to establish baseline information, 2)verification of past sampling and moni-
toring by other sources and 3)to answer public questions and concerns about
potential dioxins and furans on-site. Basicly, it is for a "Quality Check".

It is "not a site investigation" per se. They want analytical information only.
Data will help support an HRS ranking, which they are/will be performing.

CC: Debbie Kopsick, E&E/ARPM
Paul Doherty, EPA/ARPO
